

Turned Wood by Johnny W. Tolly

Care & Cleaning

DO NOT IMMERSE IN WATER

OR PLACE IN THE DISHWASHER

After use or any time cleaning is needed, simply wipe with a damp cloth and dry thoroughly.

The finish is Cortland Hunts sanding paste and finishing wax, with Mahoney's Utility Finish. These are a food safe finish. The Mahoney's finish is a specially blended walnut oil that penetrates deeply into the wood leaving a rich, durable finish that is long lasting and will not evaporate like mineral oil.

In the event over time, you might wish to freshen the finish, simply put a few drops of Mahoney's Utility Finish on a folded paper towel and wipe thoroughly covering the wood. Let the oil soak in overnight, then wipe off any excess.

Additional oil may be purchased from Amazon.com. Search for Mahoney's Utility Finish. It can also be purchased at www.woodturningcatalog.com, item #103-879.

Cortland Hunt may be contacted at 512-623-0860. His sanding paste and finishing wax are top of the line. My opinion of course.
